Look Beautiful. Feel Beautiful. Be Beautiful.

Back to School Skin Care Special

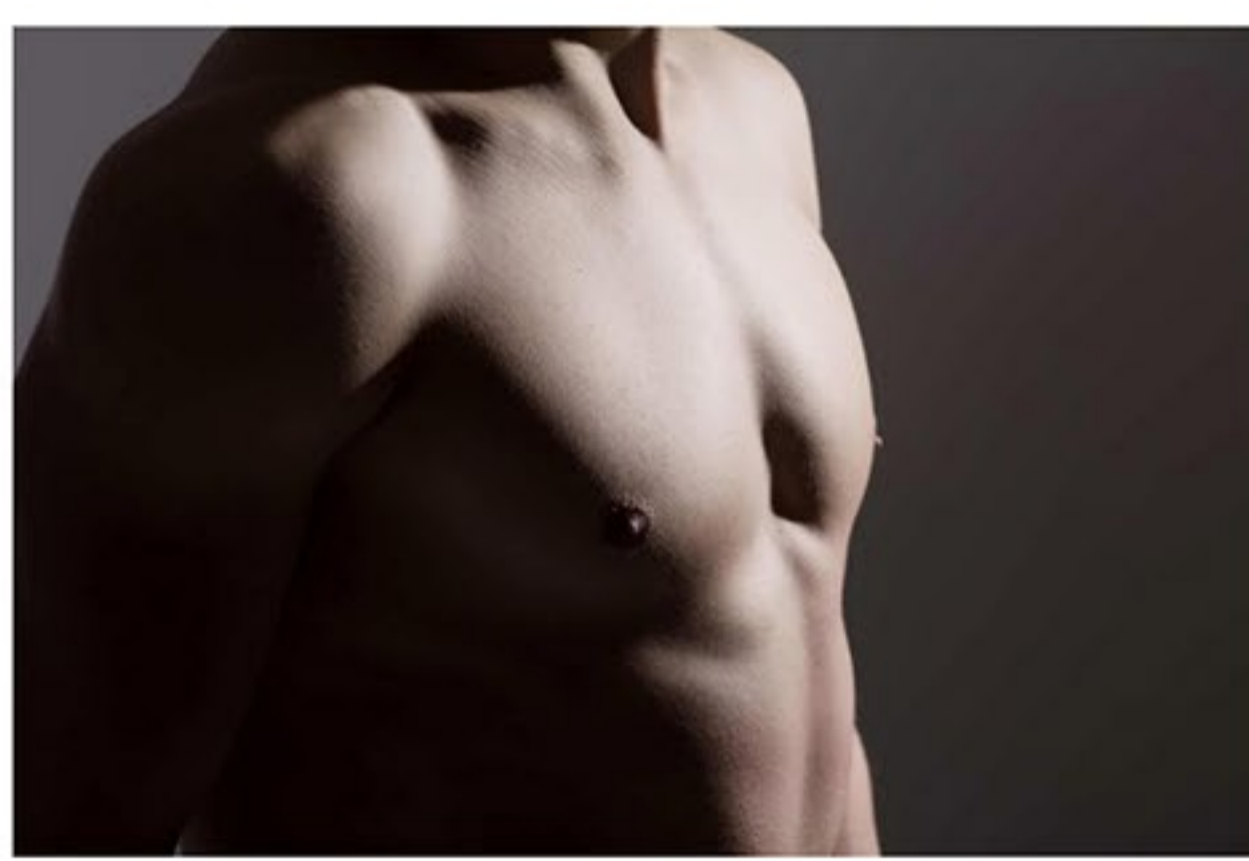

Purchase a package of 5 facials receive your 6th facial complimentary.

Shed that Summer skin with our *MicroPeel*

Micropeel (commonly referred to as the lunch hour peel) is a clinically proven procedure involving a three step process to remove a micro thin top layer of dead skin. The process combines a manual exfoliation by **dermaplaning** the skin with an epilblade also removing all facial vellus hair, **chemical exfoliation** with a solution specific for individual patient skin needs, **deep cleaning of the skin and thermal therapy**. Performed on a regular basis, this treatment reduces the primary signs of photoaging, fine lines, wrinkles and visible skin imperfections for a flawless appearance.

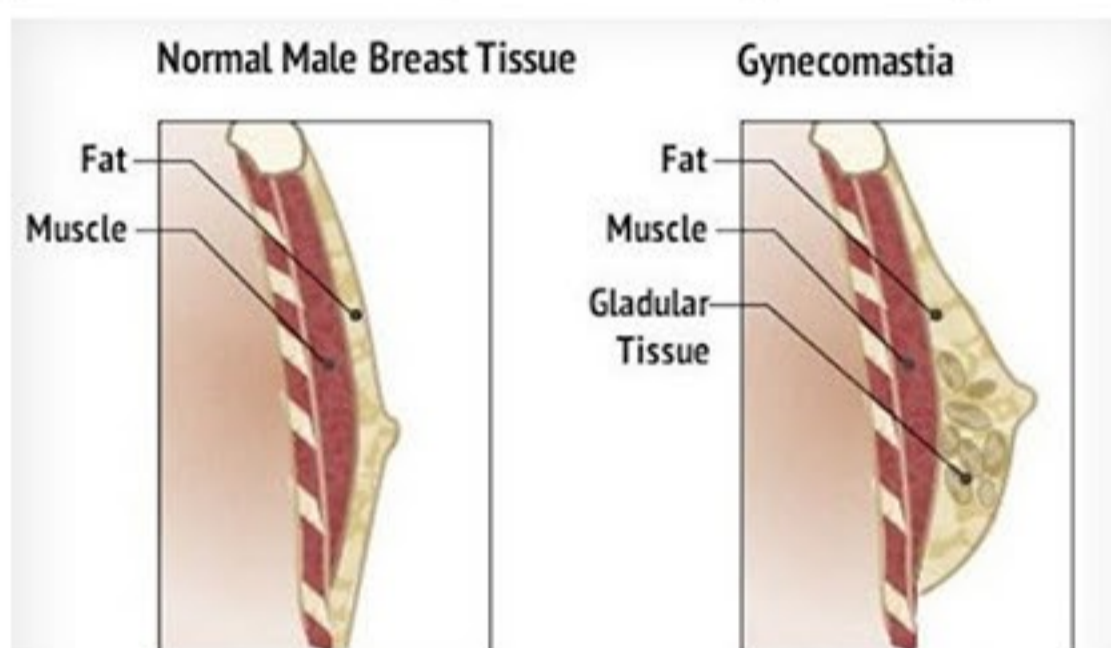

Gynecomastia

Restore a masculine physique with gynecomastia treatment

For women, an increase in breast size is usually considered a blessing; however, for men, it is the opposite. Enlarged breasts on a man can be devastating to one's self-image and confidence, and may inhibit interactions with others, especially in environments where going bare-chested is the norm, such as at the beach, in the locker room or at the pool.

While the condition of "woman-like" breasts is undesirable, it is actually quite common among men and can be easily and effectively treated by Dr. Kiran Gill.

Purchase a minimum of \$2000 in injectable treatments and receive 15% off your next injectable appointment**

Silhouette Instalift

INSTANTLY

Lift and Volumize Lax Skin

Minimally Invasive Face and Neck Lift

Natural results. No surgery.
No pain. Minimal downtime.

If you are looking for a **non-surgical facelift** that can provide results that restore your skin's once youthful firmness, the Silhouette Instalift is an excellent choice for both men and women.

The Silhouette Instalift is an FDA-approved non-surgical procedure that can treat signs of aging, including sagging facial skin and jowl creases, and a sagging jawline. Using absorbable sutures with bidirectional cones made from polymers, the skin can be repositioned and lifted without the need for more invasive surgical facelift. Over time, as the sutures dissolve, the steady regeneration of collagen restores the supple volume of youthful skin.
