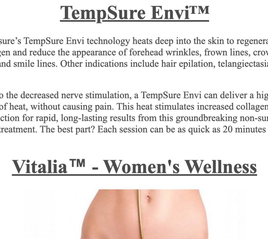
Fall into Beauty with this months specials....

$50 off one syringe of filler
$75 off two or more syringes of filler

Buy a package of 5 facials and receive your 6th facial *complimentary*

The Skin Corner
TempSure & SkinPen



Introducing the **perfect package** for fine lines, wrinkles and other skin imperfections. This is the ultimate combination to ensure the best possible results.

Why Both?

TempSure delivers radio frequency technology to gently heat your skin. This will trigger a natural response for your skin to create new collagen. The new collagen fibers are tight, dense, and neatly organized giving you tighter, younger-looking skin.

Meanwhile the **SkinPen** creates hundreds to thousands of "micro" skin punctures per second to stimulate the skin's natural wound healing process – inflammation, proliferation, and remodeling – to prompt tissue remodeling without causing scar tissue formation.

Together they create an abundance of new collagen.

Call today to see if you're a candidate!

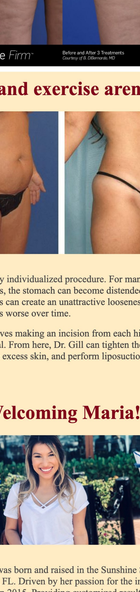
New at Aesthetics in Plastic Surgery
TempSure

TempSure Envi™

Cynosure's TempSure Envi technology heats deep into the skin to regenerate collagen and reduce the appearance of forehead wrinkles, frown lines, crow's feet, and smile lines. Other indications include hair epilation, telangiectasia, and milia.

Due to the decreased nerve stimulation, a TempSure Envi can deliver a higher level of heat, without causing pain. This heat stimulates increased collagen production for rapid, long-lasting results from this groundbreaking non-surgical laser treatment. The best part? Each session can be as quick as 20 minutes

Vitalia™ - Women's Wellness



TempSure Vitalia delivers precise heating for smaller, hard-to-reach areas to temporarily increase local circulation, decrease pain and muscle spasms.

- It's gentle
  - The treatment is well tolerated
  - It's non-invasive, non-ablative and does not require anesthesia
- It's convenient
  - Most patients resume their routines immediately after the treatment

Can be used to restore "Plumpness" to the vaginal area both internally and externally

TempSure Firm

TempSure Firm is a cellulite treatment that uses a combination of radio-frequency heat along with a specialized massage head to temporarily reduce the appearance of cellulite.
Helping you achieve a natural-looking, slimmer appearance in problem areas such as the belly, love handles, back, and thighs, with **a treatment plan that's customized to your desired results.**

When diet and exercise aren't enough

A tummy tuck is a highly individualized procedure. For many women who have had multiple pregnancies, the stomach can become distended as the abdominal muscles get weaker. This can create an unattractive looseness and sagging of the midsection that only gets worse over time.

A full tummy tuck involves making an incision from each hipbone and a second incision around the naval. From here, Dr. Gill can tighten the muscles along the abdominal wall, remove excess skin, and perform liposuction to get rid of excess body fat.

Welcoming Maria!

Meet Maria Viera. She was born and raised in the Sunshine State within the beautiful city of Naples, FL. Driven by her passion for the industry, she became a licensed Aesthetician in 2015. Providing customized results, treatments and products to compliment each patient's unique skin features allowing them to exude confidence in their appearance. Maria is always learning and researching the latest treatments and products to ensure the best possible results for her patients.

One of her personal favorites is Microneedling because of its incredible reaction on all skin types. Another favorite treatment of hers is dermaplaning which physically exfoliates the top layer of the skin leaving a smooth texture and enhancing the absorption of products and chemical peels.

Call to schedule with Maria today!
