

INFLUENTIAL WOMEN OF THE GULF COAST

There's a simple reason Dr. Kiran Gill has become a trailblazer in aesthetics. As a board certified plastic surgeon, she's passionate about knocking down barriers to beauty and believes that stunning, natural results should never compromise safety.

Offering a comprehensive suite of surgical and non-invasive services, Dr. Gill has spent the last two decades of her career transforming aesthetic care into something that doesn't feel clinical and sterile. Today, she owns and runs one of the most premier plastic surgery practices

and medical spas throughout Naples, Florida, and while she offers everything from facelifts and breast augmentation to Botox and laser hair removal, she and her team never recommend a service that they haven't either tried themselves or studied extensively.

"Yes, I'm a plastic surgeon, but I'm also a relentless learner and an artist who knows that when you feel beautiful, you also feel good about who you are," she says. "We share our lives with our patients. We struggle with the same

concerns they have, and we've lived through similar experiences. I've had Botox, and I've had surgeries, and I know how important they've been in my own life. We lead with this personalized experience, and that's what helps us empower our patients to define and step into their own version of beauty."
